General Plan				

CITY OF POMONA ADA SELF EVALUATION– APPENDIX B – SUMMARY OF DOCUMENT REVIEW FINDINGS AND RECOMMENDATIONS

Document Title			Document Summary	Findings	Recommendations
2014	1	City General Plan	The General Plan is a document adopted by City Council that outlines a vision for the City's long-range physical evolution, economic development and resources conservation. It serves as a basis for establishing and setting priorities for detailed plans and implementing programs, and decision making.	<p>*Although mobility and access was a key component of the plan, there was little mention of mobility and access as specifically pertaining to people with disabilities.</p> <p>*The General Plan does not mention persons with disabilities. It is recommended to include language throughout the plan that considers residents with disabilities as part of the inclusive community concept</p>	<p>Per the State of California 2017 General Plan Guidelines, it is advisable that a City's General Plan include policies specific to people with disabilities, such as:</p> <ul style="list-style-type: none"> *Incorporate Americans with Disabilities Act (ADA) requirements throughout the [city, county], but especially in high-volume pedestrian areas. *Require convenient and accessible parking facilities for persons with disabilities, consistent with Americans with Disabilities Act (ADA) requirements. *Provide pedestrian facilities that are accessible to persons with disabilities and ensure that roadway improvement projects address accessibility and universal design concept. * Adopt a written reasonable accommodation ordinance to provide exception in zoning and land-use for housing for persons with disabilities, for development standards such as building setbacks and parking requirements. <p>These policies are examples of recommended policies adopted by varying</p>

Active Transportation Plan				

CITY OF POMONA ADA SELF EVALUATION– APPENDIX B – SUMMARY OF DOCUMENT REVIEW FINDINGS AND RECOMMENDATIONS

Document Title		Document Summary	Findings	Recommendations	
November 2012	1	Active Transportation Plan	<p>In the Pomona General Plan, the City recognized the importance of cycling in reducing traffic, air pollution, and energy consumption, and providing greater transportation options that enhance quality of life. The City has also made great strides in improving the pedestrian environment, particularly in Downtown Pomona. This Active Transportation Plan (ATP) is consistent with these sustainability efforts and provides detailed direction on how to continue the City’s progress toward a better bicycling and walking environment. The Plan does this by proposing a system of bikeways connecting neighborhoods to key activity centers throughout the City, developing support facilities, such as bike parking, and education programs, and by identifying recommendations for improving bicyclist safety.</p>	<p>*The plan mentions the benefits of double curb ramps at intersections over perpendicular curb ramps. *States that where feasible, ramps for each crosswalk at an intersection are preferable over perpendicular curb ramps. *Refers to the policy in the City General Plan that states all urban streets and thoroughfares, except limited access highways, should have sidewalks, street lighting, and safely designed intersections for people with disabilities. *Refers to the policy in the City General Plan that state pedestrian signals should be timed in order to accommodate slower pedestrians. This should take into consideration people with slower walking speeds, such as seniors and persons with disabilities, in areas where this is appropriate. This may be also be achieved by using Pedestrian-Friendly-User-Intelligent (PUFFIN) signals that detect pedestrians in the crosswalk and extend the walk time to allow pedestrians to finish their crossing.</p>	None

ADMINISTRATIVE REGULATION

SUBJECT CITY ADMINISTRATIVE REGULATION REGARDING ACCESSIBILITY FOR INDIVIDUALS WITH DISABILITIES: CITY PROGRAMS AND SERVICES	Number 96.20	Issue 3	Page 1 of 11
	Effective Date: January 20, 2017		

1. PURPOSE

1.1. To comply with the Americans with Disabilities Act (ADA) and its implementing regulations; the Rehabilitation Act of 1973, as amended; California Government Code sections 11135-11139.5; title 24 of the California Code of Regulations; and any other applicable federal, state, and local laws and regulations protecting the rights of *Qualified Individuals with a Disability*.

2. SCOPE

2.1. This regulation applies to all City departments, boards, commissions, committees, task forces, special benefit districts, and other duly constituted bodies and offices operated by the City, and their respective programs, services and activities. The City’s policy related to employment of individuals with *Disabilities* is found in Administrative Regulation 96.21: City Policy for Individuals with Disabilities: Employment.

3. DEFINITIONS

3.1. Accessible (Architectural/Environmental) - The combination of various elements in a building, facility, or area that allows entry, circulation, and full use by *Qualified Individuals with a Disability*. Accessibility features may include, but are not limited to ramps, elevators, wide-width doors, maneuvering space, grab bars in restrooms, braille and raised letter signage, and the use of non-toxic building materials or non-scented cleaning products.

3.2. Accessible (Communication) - Oral, audio, visual, or tactile communication provided to people with hearing or vision impairments in a manner as effective as communications provided to those without hearing or vision loss. Examples of accessible communication include providing *Qualified/Certified American Sign Language Interpreters*, telecommunication devices for the deaf (*TDD/TTYs*), and assistive listening devices at public meetings.

3.3. Accessible (Programmatic) - When viewed in its entirety, each service, program, or activity is operated so as to be readily accessible to and usable by *Qualified Individuals with a Disability*. Examples of program access include providing a *Qualified/Certified American Sign Language Interpreter* at a meeting, or moving a program from an architecturally inaccessible location to an *Accessible (Architectural/Environmental)* location. Programs and services must be provided in an integrated setting that enables *Qualified Individuals with a Disability* to interact with non-disabled individuals to the fullest extent possible, unless separate or different measures are necessary to ensure equal opportunity.

	Effective Date: January 20, 2017		

CITY MANAGER or CHIEF OPERATING OFFICER

- 3.4. Auxiliary Aids and Services - Devices and services that compensate for a disabling condition and enable individuals with impaired sensory, manual, or speaking skills to have an equal opportunity to participate in, and enjoy the benefits of, programs, services, or activities conducted by the City.
- 3.5. Disability - A *Disability* is a physical or mental impairment that limits one or more of an individual’s major life activities. Categories of *Disabilities* include, but are not limited to, mobility impairment, vision impairment, hearing impairment, cognitive impairment, and multiple chemical sensitivity or environmental illness.
- 3.6. Other Power-Driven Mobility Device - Any mobility device that is used by individuals with mobility *Disabilities* for the purpose of locomotion, whether or not designed primarily for use by individuals with mobility *Disabilities*, including those powered by batteries, fuel, or other engines. This includes golf carts, electronic personal assistance mobility devices such as the Segway® PT, or any mobility device designed to operate in areas without defined pedestrian routes. *Wheelchairs* are not included in this definition.
- 3.7. Qualified Individual with a Disability - A qualified individual with a *Disability* as it pertains to City Services is one who, with or without reasonable modifications to rules, policies, practices, or the removal of architectural, communication, or transportation barriers, or the provision of *Auxiliary Aids and Services*, meets the essential eligibility requirements for the receipt of services or participation in programs or activities provided by the City.

The following people are also qualified individuals protected against discrimination under the ADA:

- 3.7.1. Individuals with a record of having a *Disability*;
- 3.7.2. Individuals regarded as having a *Disability*; and
- 3.7.3. Other individuals associated with an individual with a *Disability*.
- 3.8. Qualified/Certified American Sign Language Interpreter - An interpreter who interprets effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary, and who holds certification from the National Registry of Interpreters for the Deaf (RID), or Level 4 certification or above from the Educational Interpreter Performance Assessment (EIPA). The RID’s Code of Professional Conduct specifically prohibits misrepresentation of credentials and requires all interpreters to carry with them their certification cards and personal identification.
- 3.9. Service Animal - Any dog that is individually trained, or in training to do work or perform tasks for the benefit of the individual with a *Disability*, including a physical, sensory, psychiatric, intellectual, or other mental *Disability*. The work or tasks performed by a *Service Animal* must be directly related to its handler’s *Disability*. The crime deterrent effect of an animal’s presence and the provision of emotional support, well-being, comfort, or companionship do not constitute work or tasks for the purpose of this definition. Service

animals are not pets. Other species of animals, whether wild or domestic, trained or untrained, are not service animals for the purpose of this definition, except miniature horses which are an exception as outlined in section 4.4.7.

- 3.10. Speech-To-Speech (STS) Relay Service - STS assists anyone calling a person with a severe speech *Disability*, and allows for people with severe speech *Disabilities* to make phone calls. The service involves the person with unintelligible or otherwise difficult to understand speech, and another individual with whom they are speaking, to communicate through a communications assistant at a relay center. To use this form of relay, dial 711 and ask for “Speech-to-Speech.”
- 3.11. Telecommunication Device for the Deaf (TDD) and Text Telephone (TTY) - TDD equipment uses any telephone or telephone line to allow deaf or hard-of-hearing individuals to communicate over the telephone via an acoustic coupler. TTY is a special device that lets deaf, hard-of-hearing, or speech-impaired individuals to use the telephone to communicate by allowing them to type messages back and forth to one another instead of talking and listening. TTY communication requires that both parties have a TTY device.
- 3.12. Undue Burden - An *Undue Burden* means significant difficulty or expense. An *Undue Burden* can be either financial or administrative in nature. In determining whether an action would result in an undue burden, factors to be considered may include the nature and cost of the action; the overall financial resources of the public entity; the number of individuals employed by the public entity; the effect on expenses and resources; legitimate safety requirements that are necessary for safe operations; and the impact otherwise of the action upon the operations of the public entity
- 3.13. Video Relay Interpreting (VRI) - An interpreting service that uses video conference technology over dedicated lines or wireless technology offering high-speed, wide bandwidth video connection that delivers high quality video images.
- 3.14. Video Relay Service (VRS) - A form of Telecommunications Relay Service (TRS) that allows individuals with hearing *Disabilities* who use American Sign Language to communicate with voice telephone users through video equipment rather than through typed text. Video equipment links the *VRS* user with a TRS operator, enabling the *VRS* user and the TRS operator to see and communicate with each other in signed conversation.
- 3.15. Wheelchair - A manually-operated or power-driven device designed primarily for use by an individual with a mobility *Disability* for the main purpose of indoor and/or outdoor locomotion.

4. POLICY

4.1. Public Access to Programs, Services, and Activities

4.1.1. The City is responsible for operating programs, services, and activities that are readily *Accessible* (*Architectural/Environmental; Communication; Programmatic*) to, and usable by, *Qualified*

Individual with a Disability.

- 4.1.2. The City is responsible for providing equal opportunity to access City programs, services, and activities by:
- a. Holding meetings, programs, and other events that are open to the public at *Accessible (Architectural/Environmental)* locations.
 - b. Providing programs and services in an integrated setting, unless separate or different measures are necessary to ensure equal opportunity.
 - c. Modifying policies, practices, or procedures, when necessary, feasible, and an *Undue Burden* does not exist, to enable *Qualified Individuals with a Disability* to experience equal access to and use of City programs, services, or activities.
 - d. Ensuring information placed on the City’s website is fully *Accessible (Communication)* to *Qualified Individuals with a Disability*.
 - e. Providing *Auxiliary Aids and Services* to *Qualified Individuals with a Disability*, whenever required, in order to provide equal opportunity to access City programs, services, and activities. The City shall give primary consideration to the requests of *Qualified Individual with a Disability* in determining what types of *Auxiliary Aids and Services* are necessary. In order to be effective, *Auxiliary Aids and Services* must be provided in *Accessible (Communication)* formats, in a timely manner, and in such a way as to protect the privacy and independence of the *Qualified Individual with a Disability*.
 - i. Examples of *Auxiliary Aids and Services* for individuals with hearing *Disabilities* include but are not limited to: *Qualified/Certified American Sign Language Interpreter* on-site or through video remote interpreting (*VRI*) services; note takers; real-time computer-aided transcription services; written materials; exchange of written notes; telephone handset amplifiers; assistive listening devices or systems; telephones compatible with hearing aids; closed caption decoders; open and closed captioning, including real-time captioning; voice, text, and video-based telecommunications products and systems, including text telephones (*TTYs*), videophones, and captioned telephones, or equally effective telecommunications devices; videotext displays; accessible electronic and information technology; or other effective methods of making aurally delivered information available to individuals who are deaf or hard of hearing.
 1. The City shall not require an individual with a *Disability* to bring an interpreter.
 2. The City shall not rely on an adult or minor child accompanying an individual with a *Disability* to interpret or facilitate communication except:

- A. In an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no *Qualified/Certified American Sign Language Interpreter* available; or
- B. Where the individual with a *Disability* specifically requests that the accompanying adult (but not a minor child) interpret or facilitate communication, the accompanying adult agrees to provide such assistance, and reliance on that adult for such assistance is appropriate under the circumstances.
- ii. Examples of *Auxiliary Aids and Services* for individuals with visual *Disabilities* include but are not limited to: qualified readers; taped texts; audio recordings; braille materials and displays; screen reader software; magnification software; optical readers; secondary auditory programs (SAP); large print materials; accessible electronic and information technology; or other effective methods of making visually delivered materials available to individuals who are blind or have low vision.
- f. Including a statement indicating the City’s policy on *Access (Communication)* for individuals with *Disabilities* on all informational materials such as announcements, websites, program descriptions, forms, and other information disseminated to the public. The statement should read as follows:

To request this information in an alternative format please contact the issuing department, xxxxx@xxxx.gov, or (xxx)xxx-xxxx. A minimum of seven business days’ notice is requested to ensure availability; attempts will be made to accommodate requests with shorter notice.
- g. Providing informational materials such as announcements, websites, program descriptions, forms, and other information disseminated to the public, in an alternative format, when requested. Materials will be provided free of charge and within 5 working days. See Section 5: Responsibility, for who is responsible for this subsection.
- h. Eliminating eligibility standards or rules that deny *Qualified Individual with a Disability* physical access or equal opportunity to enjoy programs, services, or activities unless such standards or rules are necessary for the provision of the program, service, or activity due to its inherent nature.
- i. Permitting individuals with mobility *Disabilities* to use *Wheelchairs* and manually powered mobility aids, such as walkers, crutches, canes, braces or other similar devices designed for use by individuals with *Disabilities* in any areas open to pedestrian use.
- j. Permitting individuals with mobility *Disabilities* to use *Other Power- Driven Mobility Devices*,

ADMINISTRATIVE REGULATION

unless the City can demonstrate that the class of these devices cannot be operated in accordance with legitimate safety requirements. In determining whether a particular *Other Power-Driven Mobility Device* can be allowed in a specific facility as a reasonable modification, the City shall consider:

- i. The type, size, weight, dimensions and speed of the device;
- ii. The facility’s volume of pedestrian traffic;
- iii. The facility’s design and operation characteristics;
- iv. Whether legitimate safety requirements can be established to permit the safe operation of the *Other Power-Driven Mobility Device* in the specific facility; and
- v. Whether the use of the *Other Power-Driven Mobility Device* creates a substantial risk of serious harm to the immediate environment, natural or cultural resources, or poses a conflict with federal land management laws and regulations.
- k. Ensuring non-discrimination on the basis of *Disability* in contracting for the purchase of goods and services or services/programs offered to the public.
- l. Ensuring that newly constructed buildings and facilities follow all federal, state, and local rules, regulations, and building codes.
- m. Ensuring that alterations to existing buildings and facilities follow all federal, state, and local rules, regulations, and building codes.
- n. Ensuring that all space leased out by or leased for the City is *Accessible (Architectural/Environmental)* to and usable by *Qualified Individuals with a Disability*.

4.2. Legitimate Safety Requirements

4.2.1. The City may impose legitimate safety requirements necessary for the safe operation of its services, programs, or activities. However, the safety requirements must be based on actual risks, not on mere speculation, stereotypes, or generalizations about individuals with *Disabilities*.

4.3. Inquiry about Disability

4.3.1. The City shall not ask questions of a *Qualified Individual with a Disability* using a *Wheelchair or Other Power-Driven Mobility Device* about the nature and extent of the individual’s *Disability*. The City may ask a person using an *Other Power-Driven Mobility Device* to provide a credible assurance that the mobility device is required because of the person’s *Disability*. The City shall accept the presentation of a valid, State-issued *Disability* parking placard or other proof of *Disability*, or verbal representation, not contradicted by observable fact, that the *Other Power-Driven Mobility Device*

is being used for a mobility *Disability*.

4.4. Service Animals

- 4.4.1. General - The City shall allow the use of a *Service Animal* or *Service Animal in Training* (i.e., a dog or miniature horse) by an individual with a *Disability*. Individuals with *Disabilities* shall be permitted to be accompanied by their service animals in all areas of the City open to the public.
- 4.4.2. Inquiries about a Service Animal - The City shall not ask about the nature or extent of a person's *Disability* or request or require documentation about the animal, such as proof that the animal has been certified, trained, or licensed.
- a. In cases where it is unclear what service an animal is providing, the City may ask two questions in order to determine whether an animal qualifies as a service animal:
 - i. Is the animal required because of a *Disability*?
 - ii. What work or task has the animal been trained to perform?
 - b. The City may not ask the handler to have the *Service Animal* demonstrate the work or task. Examples of work or tasks include but are not limited to: assisting individuals who are blind or have low vision with navigation and other tasks; alerting individuals who are deaf or hard of hearing to the presence of people or sounds; providing non-violent protection or rescue work; pulling a *Wheelchair*; assisting an individual during a seizure; alerting individuals to the presence of allergens; retrieving items such as medicine or the telephone; providing physical support and assistance with balance and stability to individuals with mobility *Disabilities*; and helping individuals with psychiatric and neurological *Disabilities* by preventing or interrupting impulsive or destructive behaviors.
 - c. Service animals are subject to local dog licensing and vaccination requirements.
- 4.4.3. Animal under Handler's Control - A *Service Animal* must have a harness, leash, or tether. The *Service Animal* must be otherwise under the handler's control through voice commands, or other effective signals, if the individual with a *Disability* is unable to use a harness, leash, or tether because of a *Disability* or because it would interfere with the service animal's safe, effective performance of work or tasks.
- 4.4.4. Exclusions - The City may ask an individual with a *Disability* to remove a *Service Animal* from public facilities if:
- a. The animal is out of control and the animal's handler does not take effective action to control it;
 - b. The animal is not housebroken; or

ADMINISTRATIVE REGULATION

	Effective Date: January 20, 2017		

- c. The animal is a direct threat to the health or safety of others.
 - i. If the City properly excludes a *Service Animal* under this regulation, it shall give the individual with a *Disability* the opportunity to participate in the service, program, or activity without having the *Service Animal* on the premises.

4.4.5. Responsibility - The City is not responsible for the care or supervision of a service animal, including situations in which the animal has been excluded from a public facility for any of the above reasons.

4.4.6. Surcharges - The City shall not ask or require an individual with a *Disability* to pay a surcharge or to comply with any requirements generally not applicable to people without pets. Even if people accompanied by pets are required to pay fees for their pets, individuals with service animals are not to be charged a fee for their *Service Animal* to accompany them. However, if the City normally charges individuals for damage caused by their pets, an individual with a *Disability* may be charged for damage caused by his or her service animal.

4.4.7. Miniature Horses - In determining whether reasonable modifications in policies, practices, or procedures can be made to allow a miniature horse into a specific facility, the City shall consider:

- a. The type, size, and weight of the miniature horse and whether the facility can accommodate these features;
- b. Whether the handler has sufficient control of the miniature horse;
- c. Whether the miniature horse is housebroken; and
- d. Whether the miniature horse’s presence in a specific facility compromises legitimate safety requirements that are necessary for safe operation.
 - i. Other requirements as specified in sections 4.4.1 through 4.4.6, which apply to service animals, shall also apply to miniature horses.

4.5. Technology

4.5.1. Web Content – Content on all website and web applications created, bought, leased, or otherwise employed by the City for public use shall meet the Web Content Accessibility Guidelines (WCAG) 2.0 Level AA and any successive WCAG guidelines most current at the time of application.

4.5.2. Emergency Services - Telephone emergency services, including 911 and reverse 911 services, shall provide direct access to individuals who use *TDD/TTYs*.

4.6. Public Access to City Meetings and Records

4.6.1. The City Clerk's Office will coordinate the provision of *Qualified/Certified American Sign Language Interpreters* or oral interpreters for City Council meetings when requested by an individual with a

hearing impairment.

- 4.6.2. The Council Administrator’s Office will coordinate the provision of a *Qualified/Certified American Sign Language Interpreters* or oral interpreters for City Council Committee meetings when requested by an individual with a hearing impairment.
- 4.6.3. Requests for auxiliary aids, services, or interpreters require different lead times. The City, and contracting agencies who provide the interpreters, request a minimum notice of seven business days to ensure the availability of an interpreter, though attempts will be made to accommodate requests with shorter notice.
- 4.6.4. The City Clerk’s Office will serve as a central location for storage and distribution of the City’s Assistive Listening Devices for Council Chambers and the Council Committee Room.
- 4.6.5. The City Clerk’s Office will ensure that the TTY number is listed whenever City Clerk office voice phones are listed. The proper format is:

_____ - _____ Voice
_____ - _____ TTY

- 4.6.6. The City Clerk, upon request, will provide printed materials in alternative formats such as braille, large print, audio tape, or electronic format. The City’s ADA Coordinator will assist, as needed, with any of the above requirements.
- 4.6.7. The City Clerk will include a statement on all City Council meeting agendas. The statement should read as follows:

This information will be made available in alternative formats upon request by contacting [NAME] at [(###) ###-####] or mail to: [EMAIL ADDRESS]. To ensure availability, a minimum of seven business days’ notice is requested for Disability-related modifications or accommodations required to facilitate meeting participation, including requests for auxiliary aids, services, or interpreters; attempts will be made to accommodate requests with shorter notice.

- 4.6.8. The Council Administrator will include a statement on all City Council Committee meeting agendas. The statement should read as follows:

This information will be made available in alternative formats upon request by contacting [NAME] at [(###) ###-####] or mail to: [EMAIL ADDRESS]. To ensure availability, a minimum of seven business days’ notice is requested for Disability-related modifications or accommodations required to facilitate meeting participation, including

requests for auxiliary aids, services, or interpreters; attempts will be made to accommodate requests with shorter notice.

4.6.9. The City shall not ask or require an individual with a *Disability* to pay a fee for any requests for *Auxiliary Aids and Services, Qualified/Certified American Sign Language Interpreters*, assistive listening devices, materials in alternative formats, or any other *Accessible (Programmatic)* accommodation.

5. RESPONSIBILITY

5.1. Executive Director for the Office of ADA Compliance and Accessibility

5.1.1. Monitors and assists all departments to ensure that the City complies with federal, state, and local *Disability* laws and regulations, provides information for ensuring the regulations are met, and is the *designated ADA Coordinator for the City*.

5.2. City Clerk of their Designated Representative(s)

5.2.1. Coordinate the provision of *Auxiliary Aids and Services* to the public for all City Council activities and the distribution of all public information related to City Council actions, in addition to responsibilities listed in section 4.6.

5.3. Council Administrator

5.3.1. Coordinate the provision of auxiliary aids to the public for all Council Committee activities, as well as the distribution of all public information related to Council Committee actions.

5.4. Department Directors or their Designated Representative(s)

5.4.1. Ensuring that the regulations stated in this Administrative Regulation are carried out in their department for all programs, services, activities, and meeting. Directors need to plan for ongoing accommodations, such as assistive devices or adaptive equipment needs, in their annual department budgets in order to provide *Access (Architectural/Environmental, Communication, and Programmatic)* to the public and to provide reasonable accommodations for employees with *Disabilities*.

Survey for City of Pomona, CA
Americans with Disabilities Act (ADA)
Program and Facility Users Survey Form

The City is seeking input from agencies, organizations, and individuals with disabilities to help the City enhance accessibility to its facilities, programs, services and events.

The City of Pomona is in the process of preparing their ADA Self Evaluation and Transition Plan which is required by Americans with Disabilities Act (ADA) Title II (28 CFR §35.105(a)). Your input will assist the City in improving its ability to serve the needs of people with disabilities and their families.

It is the policy of the City that all City-sponsored public meetings and events be architecturally and programmatically accessible to people with disabilities. This checklist has been developed in order to assist you, the organizer, in ensuring that your meeting and/or event is accessible.

Please discuss the results of the following questions with the City’s ADA Coordinator to ensure that the meeting or event will be in compliance with ADA requirements.

Individual terms used in the checklist are defined in the “Definitions” section of this document.

Section One: Architectural Accessibility Checklist																											
Event Set-up:	YES	NO	N/A																								
If a stage or raised dais is provided, is it accessible by means of a ramp, wheelchair lift, or portable wheelchair lift.																											
Fencing or other crowd control barriers are placed so as to provide an accessible route.																											
If a stage, raised platform, or dais is provided, and it would be very difficult to make provisions for wheelchair access, describe alternative options for accessibility.																											
Getting to the Event:																											
An accessible route exists from the street and from the disabled parking spaces to the event and all event activities.																											
All public events should have proper signage to direct the public to the location.																											
Accessible parking: Does the meeting, event site, or facility provide sufficient disabled parking spaces?

Do all notices and/or announcements for the meeting or event include ADA accessibility compliance information? This includes agendas, brochures, pamphlets, and web site notifications.																			

Do all notices and/or announcements for the meeting or event include information on whom to contact to request ADA accommodations? For example, the City’s ADA Coordinator, the City’s Department staff member, or event planner (name & phone).			
If a sound system is provided, are provisions made for people with hearing impairments who need sound amplification devices as an auxiliary aid?			
If film or video materials are produced by the City, are they closed captioned for the deaf and hearing impaired?			
If printed materials are provided, are they available in alternative formats? For example, large print copies and/or electronically.			

ACCESSIBLE PUBLIC EVENT POLICY: DEFINITIONS

Accessibility information – Meeting or Event Notice shall include information on how to request accommodations, including alternative formats or auxiliary aids and services, notice of wheelchair accessibility, and information on whom to contact to make accommodation requests. Please see "Sample Accessible Meeting Notice," and "Sample Accessible Event Notice" below.

Accessible dais – A fixed or mobile public speaking location that includes a table or podium that is no higher than 34” on which a microphone can be placed.

Accessible drinking fountains – Drinking fountain with the bubbler no higher than 36” with knee clearance underneath that is 27” high x 18” minimum deep.

Accessible exhibit materials – Alternatives that provide equivalent exhibit information for people with sensory disabilities in a manner appropriate to the program material. Examples include, but are not limited to:

- Titles of work and narrative using large 14-point san serif fonts on a high contrast background
- Taped audio descriptions of photographs/artwork
- Tactile replicas of art objects
- Captioning of video or film presentations
- Trained staff available to provide descriptions or tours

Accessible surface – Firm, stable and slip-resistant surfaces, such as concrete, asphalt, wood, carpet, etc. Grass, wood chips and sand are not accessible surfaces.

Accessible parking – Parking which is set aside for exclusive use by people with disabilities, located near the accessible entrance to the facility. **Note:** Temporary accessible spaces can be created using signs and cones, provided that dimensional requirements are met (contact the Santa Rosa Public Works Department for temporary signage).

Accessible portable toilets and sinks – Toilets and sinks that meet state and federal requirements for accessibility. Acceptable toilet manufacturers include but are not limited to Satellite and L&L Manufacturing. If one unit is to be provided, it must be accessible. When multiple units are provided, a minimum of one-unit with 10% of the total units provided shall be accessible. Accessible toilets and sinks shall be disbursed among the various locations and located on a level area, along an accessible route with an accessible surface. At each location there should be at least one accessible toilet and sink available. **Note:** This information is provided for situations in which the general public will be using portable toilets. A portable, accessible toilet is NEVER equivalent access if the general public is using indoor toilets.

Accessible restrooms – Restrooms that are located on an accessible route and contain accessible features, including grab bars in bathroom stalls, wide bathroom stalls, etc.

Accessible route – A continuous unobstructed path connecting all accessible elements and spaces of a building or facility. Interior accessible routes may include corridors, floors, ramps, elevators, lifts, and clear floor space at fixtures. Exterior accessible routes may include parking access aisles, curb ramps, crosswalks at vehicular ways, walks, ramps, and lifts.

Accessible tables – A table providing knee space that is a minimum of 27” high, 30” wide and 19” deep knee space with the tabletop no higher than 34”.

Accessible Telephones – Telephones that are located on an accessible route, mounted at 48” from the floor to the coin slot and have volume controls.

Assistive Listening Device – A device that takes a signal from a microphone or public address system and sends it to a personal amplification system.

Captioned – Video or film program with subtitles reflecting the content of the spoken or descriptive material.

Directional Signage – Include the International Symbol of Accessibility (ISA) with the directional signage.

Hazards to blind or visually impaired participants – Pedestrian and participant areas shall be clear of

objects (including plant branches and public art) which overhang less than 80” from the floor surface, or wall, and post mounted or freestanding objects that protrude 4” or more between 27” and 80” above the floor or ground.

Portable wheelchair lift – A lift that is not built into the structure but can be available for a specific event.

Seating location - Accessible seating must be situated so those individuals who cannot stand can view the meeting or event over seated or standing participants. Seating for persons who are deaf must be provided in a location near the stage/presentation area with direct view to the stage/presentation location of sign language interpreters.

Wheelchair and companion seating – Seating for wheelchair users and adjacent seating for individuals accompanying wheelchair use

ASSISTIVE LISTENING SYSTEMS

KEY CONCEPTS

- An assistive listening system must be provided in assembly areas, including conference and meeting rooms.
- Each assembly area required to provide assistive listening systems must provide signs informing patrons of the availability of the assistive listening system.
- The minimum number of receivers to be provided must be equal to 4% of the total of seats, but in no case less than 2.
- 25% minimum of receivers provided, by no fewer than 2, must be hearing-aid compatible.
- If the assistive listening system provided is limited to specific areas or seats, then such areas or seats must be within a 50-foot viewing distance of the stage or playing area and must have a complete view of the stage or playing area,
- Permanently installed assistive listening systems are required in areas if they accommodate at least 50 persons or if they have audio-amplification systems and they have fixed seating.
- If portable assistive listening systems are used for conference or meeting rooms, the system may serve more than one room.
- An adequate number of electrical outlets or other supplementary wiring necessary to support a portable assistive listening system must be provided.

NUMBER AND LOCATION OF ASSISTIVE LISTENING SYSTEMS

- Min. number of receivers: 4% of the total number of seats, but in no case less than 2
- Hearing-aid compatible receivers: 25% min. but no fewer than 2

CURRENT TECHNOLOGY

At the time of this report, there are three basic wireless technologies available which provide different methods of transmission:

1. FM Broadcast Technology (FM)
2. Infrared Light Technology (IR)
3. Induction Loop Technology

No single technology is best for all applications. Each type has its own advantages, problems and limitations. All three types of assistive listening technologies can easily and successfully be used for personal and commercial applications alike, as long as their individual limitations are kept in mind.

TYPE 1: FM BROADCAST TECHNOLOGY

In principle, FM systems designed for hearing assistance application work just like commercial FM broadcast systems operating in the 88 to 108 MHz range. However, in the United States, the FM systems operate at FCC-designated frequency bands in the range from 72 to 76 MHz and from 216 to 217 MHz since each FM system may use its own broadcast frequency, several systems can operate simultaneously at one location without interfering with one another. Unlike the loop system, the FM system requires a special receiver for each person, whether they have a hearing aid or not. There are several listening options available for FM receivers. The most common for public facilities are headphones and neck loops for T-coil users. Typical applications include outdoor open-air assembly areas.

Advantages

- Easy to move around
- Easy to install
- 17 wide-band and /or 40 Narrow-band and to choose from
- Transmission range up to 1,000 ft

Disadvantages

- Receivers required for everyone
- Both headphone and neck loop options must be available at public facilities
- For multi-applications, receivers must operate on different channels
- Cannot be used when confidentiality is an issue as FM signal can be tapped from the outside

TYPE 2: INFRARED LIGHT TECHNOLOGY (IR)

Infrared light can be used for signal transmission in same fashion as with FM transmission. An infrared system consists of two or three basic components: a modulator and an emitter which often are combined, and a receiver. The audio signal is conveyed onto a sub-carrier in the modulator which in turn is converted into infrared light by the emitter. The receiver detects the IR signal and converts it back into the original audio signal. However, unlike FM transmission and induction loop technology, infrared light cannot pass through walls. Therefore, infrared light transmission is ideal for facilities operating several systems simultaneously in different rooms in that all receivers can be identical with no need for frequency coordination. As with FM technology, each person must use a receiver, whether or not s/he has a hearing aid. Receiver types include lightweight under-the-chin style, over-the-head receivers for 360 degree reception and body-pack style. The same listening options are available for the body-pack style receivers as for the FM receivers. Typical applications are for indoor assembly areas with no interruption to the direct line of sight.

Advantages

- ❑ Multiple systems can run simultaneous without interfering with one another.
- ❑ Insures confidentiality as IR signals cannot penetrate through walls.
- ❑ No size limitation as emitter panels may be daisy-chained.

Disadvantages

- ❑ Receivers required for everyone.
- ❑ Both headphone and neck loop options must be available at public facilities.
- ❑ Not practical for outdoor applications due to sunlight interference.
- ❑ Installation can be costly for large venue systems

TYPE 3: INDUCTION LOOP TECHNOLOGY (TELELOOP - HEARING LOOP - ROOM LOOP)

This technology is based on electromagnetic transmission and has the unique advantage that the signal is received directly by the user's hearing aid when it is equipped with a T-coil (telemagnetic pickup coil). It is commonly referred to as a telephone switch. An induction loop system consists of an amplifier and a discrete wire (the loop) that runs along the perimeter of the room. When the loop amplifier receives a signal from an audio source such as a microphone or PA system, the sound is received wireless by the user's hearing aid without the need for an additional receiver as is required by all other technologies. Induction receivers are available for hearing impaired people without hearing aids or without the T-coil feature. Typical application includes indoor or outdoor areas – outdoor venues may utilize portable loop systems.

Advantages	Disadvantages
<ul style="list-style-type: none"> ❑ Transmits directly to hearing aids equipped with T-coils - no receiver required ❑ Unobtrusive with T-coil hearing aids-individuals are not required to request equipment or assistance ❑ Only 50% induction receivers required compared to FM and IR systems 	<ul style="list-style-type: none"> ❑ Professional design and installation required ❑ Size limitations or layout restrictions may apply ❑ Listening area may be subject to electrical interference from power lines, high power equipment etc ❑ The loop itself may be difficult or impossible to install at some facilities. ❑ Cannot loop adjacent rooms due to spill-over effect

TOUR GUIDE SYSTEMS

Tour Guide Systems are portable systems for use by mobile tour groups, i.e. walking, biking, etc. Typical applications are indoors and outdoors in parks, museums, galleries and other public places. They are expandable by adding additional receivers and transmitters.

Advantages

They are mobile and expandable by adding additional receivers and transmitters.

Disadvantages

They have limited transmitting range so the group must stay close to the guide.

SYSTEMS COMPLIANT WITH ADA & CBC

Assistive Listening Systems must comply with ADAS sections 216, 219, and 703. They must also comply with CBC sections 11B-216, 11B-219 and 11B-706. Specification sheets are needed to verify compliance.

VENDORS

The ideal system is not only compliant with the ADAS and the CBC, but depends upon the venue, environment, services and goals. The following vendors can be contacted to supply information, suggestions on appropriate systems, and specifications on compliant systems they offer.

CITY OF POMONA ADA SELF-EVALUATION/TRANSITION PLAN – APPENDIX G – ACTION LOG

**City of Pomona ADA Self Evaluation and Transition Plan
Volume 1: Policies and Procedures Implementation Plan (Action Log)**

Report Status Date: December 2020

Section Number	Summary Description of Finding	Recommendation	Funding Source	Cost	Current Status	Target Date	Department/Person Responsible for Implementation:
Public Notice and Written Notifications							
2.2.1	Website has links but no formal published Americans with Disabilities Act (ADA) Notice	Upload formal ADA Notice to City Website, post at public counters and bulletin boards, include in social media, post at facilities, publish in local newspapers, and/or include it in program announcements.			Pending	FY 22	ADA Coordinator
ADA Coordinator							
2.2.2	City has a designated ADA Coordinator (Human Resources/Risk Management Director Linda Matthews)	Publish ADA Coordinator's name on City website			Pending	FY 22	Website Administrator
		Consider creating an ADA liaison team to improve awareness in all departments			Pending	FY 22	ADA Coordinator
		Provide periodic training opportunities to the ADA coordinator regarding their roles and responsibilities			Pending	FY 22	ADA Coordinator
		Include ADA Coordinator contact information on public notifications.			Pending	FY 22	ADA Coordinator
Grievance Procedure							
2.2.3	No formal published grievance procedures	Adopt a City-wide Grievance Procedure. Sample provided.			Pending	FY 22	City Policymakers
	City staff are generally not aware of how and with whom to file a formal grievance/complaint.	Post ADA notice at all public counters.			Pending	FY 22	ADA Coordinator
		Provide staff training opportunities on how and with whom to file a disability discrimination complaint.			Pending	FY 22	ADA Coordinator
		Establish a system for the annual evaluation of policies and practices for implementing the adopted grievance procedures.			Pending	FY 22	ADA Coordinator

CITY OF POMONA ADA SELF-EVALUATION/TRANSITION PLAN – APPENDIX G – ACTION LOG

Fees and Surcharges							
2.2.4	There are no circumstances in which a person with a disability would be asked to pay a fee or meet any other requirement not imposed on other program participants for the City, but there is also no written policy prohibiting the charging of fees to provide reasonable accommodations.	Develop a written City-wide policy that prohibits the charging of fees or surcharges to provide reasonable accommodations to facilities, programs, services or activities to persons with disabilities.			Pending	FY 22	City Policymakers
Use of Consultants							
2.2.5	The City uses outside contracted employees to provide services to the public.	Contractors (professional design consultants, construction contractors, contract employees, etc.) shall be notified and/or continue to be notified of their obligations to abide by the same accessibility requirements as the City.			Pending	FY 22	Contracts
		Continue to have contracts reviewed by the City Attorney to ensure that outside consultants/contractors are notified of their responsibilities for providing services in a nondiscriminatory manner.			Pending	FY 22	Contracts
		Develop a written policy that outlines how contracted employees and consultants shall operate per City accessibility policies and standards.			Pending	FY 22	Contracts
		Online service providers shall be required to abide by web accessibility guidelines.			Pending	FY 22	Contracts

CITY OF POMONA ADA SELF-EVALUATION/TRANSITION PLAN – APPENDIX G – ACTION LOG

Access to Programs, Services, and Activities							
2.2.6	The city has no policies or practices that could have the direct or indirect effect of excluding or limiting the participation of individuals with disabilities.	Develop a written policy that describes the City's commitment that they will not adopt any policies that are discriminatory or engage in practices that are discriminatory. See sample policy in Appendix C.			In-Progress	FY 22	City Policymakers
		Provide periodic city-wide compliance reviews.			Pending	FY 22	ADA Coordinator
	The City has a beach wheelchair, but no access across the sand.	Provide beach mats to create an accessible path across the sand toward the water.		\$2000-\$4000 for 50' or 100'	Pending	FY 22	ADA Coordinator
		Ensure that the availability of beach wheelchairs and beach mats is publicized on an accessible page on the city website, and that instructions are provided about how to reserve a beach wheelchair.			Pending	FY 22	ADA Coordinator
Modifications to Policies, Practices, or Procedures							
2.2.7	The City has a formal policy and forms for "reasonable accommodations" for the public to use.	Continue to publish a reasonable accommodation policy and form. Sample form provided.			Pending	FY 22	City Policymakers
	The City does not have a process for determining whether a policy or practice modification would fundamentally alter the nature of the program or service being offered.	Establish a formal process for determining whether a policy or practice modification would fundamentally alter the nature of the program or service being offered.			Pending	FY 22	City Policymakers
Public Meetings							
2.2.8	Not all public meeting notices contain information relative to how auxiliary aids and services can be obtained.	Include Notification of ADA Compliance on all City public meeting notices.			Pending	FY 22	ADA Coordinator

CITY OF POMONA ADA SELF-EVALUATION/TRANSITION PLAN – APPENDIX G – ACTION LOG

	There is no available information regarding accommodations and the process for requesting auxiliary aids, assistive listening devices, interpreters, alternative formats, specialized equipment or assisted services.	Continue to ensure that public meetings are held in locations that comply with ADA requirements in terms of being architecturally accessible to individuals with disabilities.			Pending	FY 22	ADA Coordinator
		Publicize the availability of auxiliary aids, assistive listening systems, interpreters, alternative formats, specialized equipment or assisted services at public meetings.			Pending	FY 22	ADA Coordinator
	There is no policy in place to ensure all videos posted are captioned.	Adopt a policy that all videos and PowerPoint presentations are to be captioned.			Pending	FY 22	City Policymakers
Equally Effective Communication							
2.2.9	The City does not have a list of available interpreters, readers, etc. to be used to accommodate requests.	Maintain a list of on-call American Sign Language interpreters who may be brought to meetings to assist individuals with hearing disabilities. This list shall be available to all City departments so that when a request is made, interpreters can be provided in a timely manner. City of Pomona - Website Accessibility Inspection - <http://www.ci.pomona.ca.us/>
July 24, 2020

INSPECTION OVERVIEW - WEBSITE ACCESSIBILITY INSPECTION

WEBSITE ACCESSIBILITY INSPECTION KEY TAKEAWAYS

- Based on the sampling of pages inspected on the website <http://www.ci.pomona.ca.us/>, website accessibility barriers were found. Barriers found range in severity from minor to critical, and impact disabled users with vision and motor impairments.
- The report includes Screen reader testing using JAWS Screen Reader on Windows 10 and Google Chrome, Screen reader testing using Apple iPhone on Voiceover and Apple Safari, Keyboard-only testing on Windows 10 and Google Chrome, Color contrast testing on Windows 10 and Google Chrome, Full browser zoom testing on Windows 10 and Internet Explorer 11, and Testing using an automated tools.
- Screen-reader barriers, keyboard barriers, and color contrast barriers were found. No browser zoom or high-contrast barriers appeared on the web pages inspected.
- The inspection was completed by live persons. Compliance barriers found are converted into raw data (manually), that are used to collate the inspection and provide recommendations based on experience supporting similar accessibility complaints.
- Within this report, enough data was accumulated to make assumptions about the barriers expected to be found across all web pages. Additional inspection hours are not needed to determine the website, in its form currently, has accessibility barriers that are repeated page after page.
- To fully remediate website barriers found, administrative security access with edit ability would need to be granted. Typically website development changes for a website of this type would be completed by the original creators of the website (either internal Information Technology employees or the website vendor on record). Costs for remediation can range from \$300-\$900 per web-page dependent on the selected vendor and severity of the barrier.
- The sampling of pages inspected were selected based on their design, function, and experience inspecting similar website pages. The sampling of pages can be found below:

AMERICAN WITH DISABILITIES ACT APPLIES ONLINE

The Web Content Accessibility Guidelines (WCAG) are a series of criteria to help website owners create a website that is accessible to those with disabilities. The number of website accessibility lawsuits is increasing, and all websites are at risk of being sued if they do not demonstrate accessibility to people with disabilities. From small businesses to Fortune 500 companies and government, any website will be expected to conform to WCAG 2.0 guidelines. Proving that a website complies with these standards is critical in avoiding potential lawsuits. Although adherence to these rules cannot guarantee protection from lawsuits, it does support the claim of an Online Compliance Policy and Strategy.

INSPECTION METHODOLOGY

Barriers listed in the website include text equivalents, proper alternative text, information and meaning of structure, keyboard functionality, consistent navigation, lack of titles and description of purpose, purpose of linked text, inconsistent labeling, and improper tagging and coding.

WEBSITE INSPECTED: The website has been measured by objective criteria using as guidelines the Success Criteria Level A, AA and AAA of the Web Content Accessibility Guidelines (“WCAG”) 2.0 and 2.1. Five pages of the website were inspected using compliance software and manual tests.

BARRIERS COMPILED: Individual barriers over the website pages inspected were collected and then analyzed for level of severity.

BARRIERS DOCUMENTED: Compliance barriers were collected, compared for benchmarks across other inspections, and reported within this document.

RECOMMENDATIONS DEVELOPED: Based on the inspection, barriers found, and compliance best practices, recommended approaches and next steps for remediation were developed.

REMEDIATION SOLUTIONS: Remediation approach for achieving website compliance leveraging developers, designers, strategists, and other experts was developed.

WEBSITE ACCESSIBILITY INSPECTION OVERVIEW

1.1 TEXT ALTERNATIVES: Provide text alternatives for any non-text content so that it can be changed into other forms people need, such as large print, braille, speech, symbols, or simpler language.

1.3 ADAPTABLE: Create content presented in different ways without losing information or structure. Ensure that information is available in a form that can be perceived by all users (for example, spoken aloud or presented in a simpler visual layout).

1.4 DISTINGUISHABLE: Make it easier for users to see and hear content, including separating foreground from background. Ensure the default presentation is as easy to perceive as possible for people with disabilities.

2.1 KEYBOARD ACCESSIBLE: All functionality can be achieved using the keyboard, and can be accomplished by keyboard users, by speech input, by mouse, and by other assistive technologies that create keystrokes as their output.

2.3 SEIZURE COMPLIANT: Do not design content in a way that is known to cause seizures. Ensure that content that is marked as conforming to WCAG 2.0 avoids the types of flashes that are most likely to cause seizures.

2.4 NAVIGABLE: Provide ways to help users navigate, find content, and determine where they are within a web page. Help users find the content they need and allow them to keep track of their location within a web page.

3.1 READABLE: Make text content readable and understandable. Allow text content to be read by users and by assistive technology, and ensure that information necessary for understanding it is available.

3.2 PREDICTABLE: Make web pages appear and operate in predictable ways. Help users with disabilities by presenting content in a predictable order from web page to web page and by making the behavior of functional and interactive components predictable.

3.3 INPUT ASSISTANCE: Help users avoid and correct mistakes. Reduce the number of serious or irreversible errors that are made, increase the likelihood that all errors will be noticed by the user, and help users understand what they should do to correct an error.

REMEDIATION COST CONSIDERATIONS

TO REMEDIATE BARRIERS FOUND WOULD REQUIRE 3-5 HOURS OF LABOR PER WEB PAGE

Based on website compliance best practices and the barriers found within the website, it is estimated the labor hours required for remediation would be 3-5 hours of labor per web page. Administrative

security access with edit ability would need to be granted to vendor selected for remediation. Typically website development changes for a website of this type would be completed by the original creators of the website (either internal Information Technology employees or the website vendor on record). Cost for website design and development can range from \$99 per hour to \$200 per hour or more depending on the vendor selected. Based on this estimate, remediation using experienced website developers would range from \$300-\$900 per webpage. This range not only depends on the vendor but also the complexity and severity of the accessibility barriers. Based on the expected rates calculated for remediation, if creating a new website has been considered, now would be the most cost-advantageous time. Creating a new website with accessibility guidelines from the start can prove to be more cost efficient than post-completion remediation.

CONDUCT ONLINE ACCESSIBILITY COMPLIANCE TRAINING

Based on website compliance best practices, conduct a training course with website administrators and company executives (managers and operators). This training would include an overview of the accessibility guidelines, website and online best practices for compliant websites, and recommended remediation strategies. This can be conducted via web-conference or in person.

COMPLIANCE WITH SCREEN READER TECHNOLOGY

Screen readers are a specific use case of text-to-speech technology that improve accessibility for people with visual disabilities. Popular screen readers are JAWS, NVDA, and ZoomText for Windows and Voiceover for Apple. Many of the barriers found relate to screen reader technology, including non-textual content having text alternatives and the language of each web page and website passage or phrase being able to be programmatically determined by a software application.

DEVELOPMENT OF PUBLIC WEBSITE ACCESSIBILITY POLICY

Create and publish a public website accessibility policy to state the commitment the business is making to be compliant. This includes any future remediation efforts and contact information to report compliance barriers.

DOCUMENTATION AT EVERY STEP

At every step of the way, documentation is needed as substantiation of online compliance. An initial evaluation, implementation strategy, post-completion audits, and ongoing evaluations should be documented. Documentation of the Policy and Improvements are needed at each stage of the process and on an ongoing basis.

APPENDIX

GUIDELINES DICTATING ACCESSIBILITY

Based on the current website accessibility standards, inspections are reviewed based on the five website accessibility guidelines: Alternatives, Presentation, User Control, Understandable, and Predictable.

Guideline 1. Alternatives: All images and non-text content must have alternative text. This includes alternatives for video and audio (transcripts, closed captioning, audio descriptions, and live captions).

Guideline 2. Presentation: Proper markup techniques to structure content is needed, and content must be presented in a meaningful order to comply with screen reader technology. The use of color, color contrast, and text resizing must all comply with accessibility standards. Any functions, content, or instructions on the website must be developed to not rely on a single sensory ability.

Guideline 3. User Control: Content and functions must be accessible by keyboard with only the ability to navigate forwards and backward. Any time limits, blinking, scrolling, movement, or other functions must have the ability to be stopped or manipulated to comply with accessibility technology. No webpage should have three or more flashes within a one-second time frame and a “skip navigation” link to bypass a web heading must be available.

Guideline 4. Understandable: Each page of a website needs to have a unique and descriptive page title, and users must be able to navigate through the website in a logical, sequential order. A website should offer multiple options to access different content or pages (search bars, navigation menu, sitemaps). Any changes in website language should be indicated.

Guideline 5. Predictable: Functions on the website should operate when specified by the user. Navigation layout should be consistent throughout and user operating errors should be easy to detect. All forms or input fields should be labelled so that users know the format expected. If an input error is detected, suggestions for correcting the error should be provided. HTML code should be free of errors and properly nested. For pages that create legal commitments, financial transactions, or any other important data submissions, one of the following must be present: submissions are reversible, the user has an opportunity to correct errors, and confirmation is available that allows an opportunity to review and correct before submission.

GUIDELINES DICTATING ACCESSIBILITY

1.1 TEXT ALTERNATIVES: Provide text alternatives for any non-text content so that it can be changed into other forms people need, such as large print, braille, speech, symbols, or simpler language. "Text" refers to electronic text, not an image of text. Electronic text has the unique advantage of being presentation-neutral. It can be rendered visually, auditorily, tactilely, or by any combination of those methods. Information rendered in electronic text can be presented in whatever form best meets the needs of the user. It can also be easily enlarged or spoken aloud so that people with reading disabilities are better able to understand it.

1.3 ADAPTABLE: Create content that can be presented in different ways (for example, in a simpler layout) without losing information or structure. Ensure that all information is available in a form that can be perceived by all users (for example, spoken aloud, or presented in a simpler visual layout). If all of the information is available in a form that can be determined by software, then it can be presented to users in different ways (visually, audibly, and tactilely). Ensure that different types of information that are often encoded in presentation are also available so that they can be presented in other modalities.

1.4 DISTINGUISHABLE: Make it easier for users to see and hear content, including separating foreground from background. Ensure the default presentation is as easy to perceive as possible for people with disabilities. This guideline is concerned with making the default presentation as easy to perceive as possible for people with disabilities. The focus is making it easier for users to separate foreground information from the background. For visual presentations, this involves information presented on top of a background contrasting sufficiently with the background. For audio presentations, this involves making sure that foreground sounds are sufficiently louder than the background sounds.

2.1 KEYBOARD ACCESSIBLE: All functionality can be achieved using the keyboard and can be accomplished by keyboard users, by speech input, by mouse, and by other assistive technologies that create keystrokes as their output. If all functionality can be achieved using the keyboard, it can be accomplished by keyboard users, by speech input (which creates keyboard input), by mouse (using on-screen keyboards), and by a wide variety of assistive technologies that create simulated keystrokes as their output. No other input form has this flexibility or is universally supported and operable by people with different disabilities, as long as the keyboard input is not time-dependent.

2.4 NAVIGABLE: Provide ways to help users navigate, find content, and determine where they are. This guideline is intended to help users find the content they need and allow them to keep track of their location. This is often more difficult for people with disabilities. It is important that the user be able to determine their location to be able to find content and navigate the site. For navigation, information about the possible destinations needs to be available. Screen readers convert content to synthetic

speech which must be presented in linear order because it is in an audio format.

3.1 READABLE: Make text content readable and understandable. This guideline is intended to allow text content to be read by users and by assistive technology, and to ensure that information necessary for understanding it is available. People with disabilities interact with text in many different ways. Some users experience great difficulty in recognizing written words yet understand extremely complex and sophisticated documents when the text is read aloud, or when key processes and ideas are illustrated visually or interpreted as sign language. For some users, it is difficult to infer the meaning of a word or phrase from context, especially when the word or phrase is used in an unusual way or has been given a specialized meaning; for these users, the ability to read and understand may depend on the availability of specific definitions or the expanded forms of acronyms or abbreviations.

3.2 PREDICTABLE: Make web pages appear and operate in predictable ways. This guideline is intended to help users with disabilities by presenting content in a predictable order from web page to web page and by making the behavior of functional and interactive components predictable. It is difficult for some users to fully understand the format of a web page. Screen readers present content as a one-dimensional stream of synthetic speech that makes it difficult to understand spatial relationships.

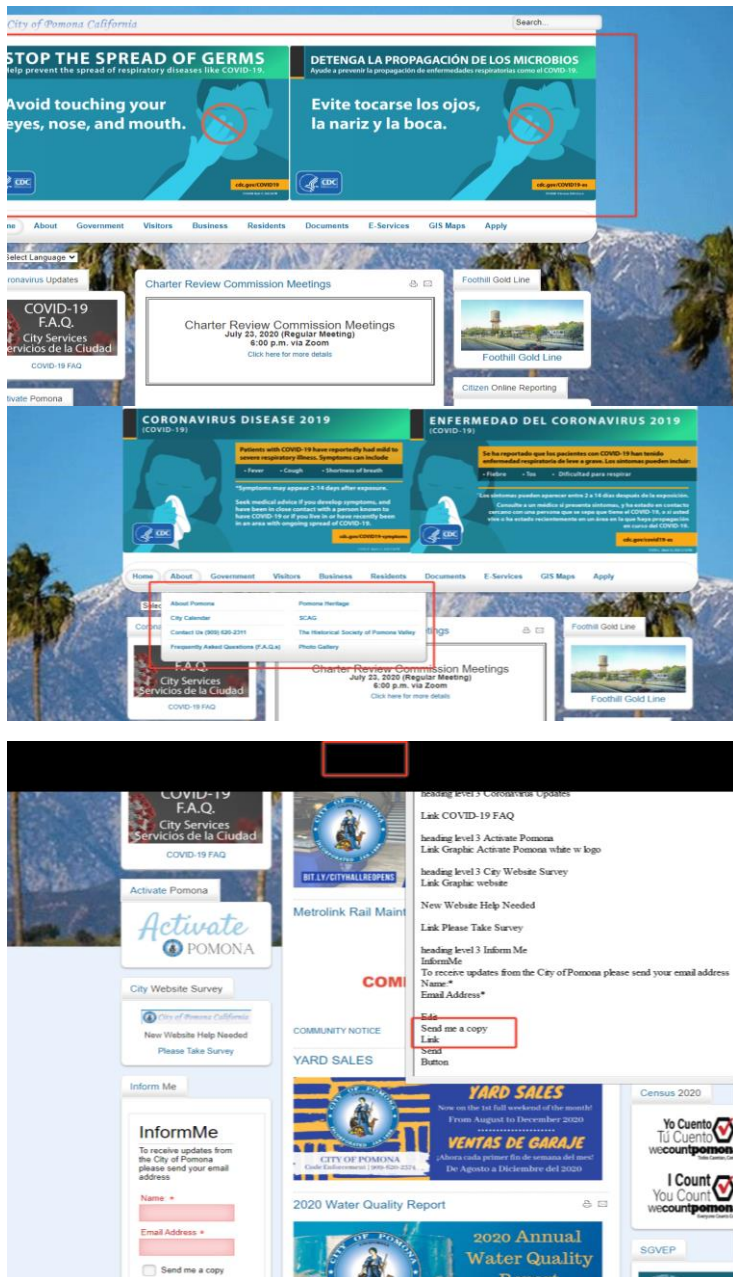

3.3 INPUT ASSISTANCE: Help users avoid and correct mistakes. Reduce the number of serious or irreversible errors that are made, increase the likelihood that all errors will be noticed by the user, and help users understand what they should do to correct an error. People with some disabilities have more difficulty creating error-free input. In addition, it may be harder for them to detect that they have made an error. Typical error indication methods may not be obvious to them because of a limited field of view, limited color perception, or use of assistive technology. This guideline seeks to reduce the number of serious or irreversible errors that are made, increase the likelihood that all errors will be noticed by the user, and help users understand what they should do to correct an error.

The City of Pomona has various commissions that serve as advisory bodies to the City Council. Appointment to a commission is both an honor and a heavy responsibility. Not only does it signify the confidence of the City Council in the member's wisdom and judgment, but places upon the member the attendant duties of regular attendance at meetings and consistent working and voting towards an implementation of the general public interest. Such a charge is, at times, not easily borne and necessary decisions not easily made.

Notwithstanding the self-discipline required in public service, each commission member may take considerable pride in being an integral part of the process which contributes to the sound government of this City, and for this service the City Council is most appreciative. Both the challenges and rewards are great.

COMMISSION FACTS

City of Pomona commissioners are volunteers – no compensation is provided for their service. Commission service is restricted only to residents of the City. A resident may not serve on more than one commission at a time.

Citizen advisory commissions are charged with the following general responsibilities:

- Gather facts and serve in an advisory capacity on matters within their area of responsibility.
- Focus attention on specific issues and problems within their scope of responsibility and recommend actions and alternatives for City Council consideration.
- Act as a channel of communication and information between city government and the general public.
- Facilitate reconciliation of contradictory viewpoints among interested parties and project direction toward achievement of citywide goals.
- Encourage broad citizen participation toward achieving city goals.
- Assist in balancing community desires with municipal responsibility and resources.

- City Commissions provide a systematic process for citizen participation. Commissions serve as advisory bodies to the Council within the confines of their respective responsibilities.
- Each Commission is composed of Pomona residents who serve on a volunteer basis. Commissioners are appointed by the City Council. All City Commissions are subject to the Brown Act and are required to have regular meetings open to the public.
- Anyone who is a resident of Pomona and is interested in serving on a Commission may obtain an application from the City Clerk. A member of a Board or Commission may not hold any other City office or position for which compensation is paid.

Each commission has specific assignments as established by Ordinance or Resolution. A brief description of each commission, including its area of responsibility, follows. For additional information on the duties and responsibilities of a commission, click on that commission's title. An application for appointment may be obtained by clicking [HERE](#) or picking one up at the City Clerk's Office.
