Capital Improvement Program Project Details

Project Title: **Sewer Main Replacements - Design**

Project Description: This project will provide for the design phase of the over 20 segments of sewer mainline pipe and other adjacent street mains Citywide. Pipeline replacements are established based on an operational high priority red flag criterion. The segments of sewer pipes which will be designed were identified thru the City sewer operations staff CCTV inspection and cleaning program efforts.

Project Title: ***Sewer Manhole Rehabilitation***

Project Description: Staff has identified multiple manhole structures within the city's 314 mile Wastewater Collection System, and over 6,000 manholes that will require rehabilitation. These efforts will reduce inflow/infiltration and help restore manhole structures that have structural deficiencies. Rehabilitation methods can include chemical grout, mortar, polymer, epoxy, polyurethane, cured-in-place (CIPP) applications, and/or removal and replacement of the manhole structure and associated appurtenances. This effort will help protect the city's aging sewer infrastructure against hydrogen sulfide corrosion, sewage, and other chemicals that could affect concrete or brick structures.

Project Title: **Sewer Pipeline Replacement - Citywide (Phase IV)**

Project Description: This project provides for the replacement of sewer mains identified as Priority 3 projects from the 2013 Citywide Closed Circuit Television (CCTV) Report and confirmed by City CCTV crews. This project will replace up to 10,000 lineal feet of sewer mains per year. This project includes all associated repair construction materials/methods, associated plans/reports, and specifications in support of this project.

Project Title: **Sewer Force Mains - Pumping Plants 1, 2 and 3 Design**

Project Description: This project provides for the design of redundant force mains for Pumping Plants 1, 2 and 3 to make the force mains eligible for transfer to the Los Angeles County Sanitation Districts (LACSD). Ownership of the City's four sewer Pumping Plants and the force mains associated with Pumping Plant No. 4 was transferred to the LACSD in April 2013. The force mains for Pumping Plants 1, 2 and 3 were constructed in 1967, 1995, and 2002, respectively. Transferring these facilities will eliminate the City's future maintenance and capital costs for operation. This project includes all work, plans, specifications, cost estimates, associated easements, and materials in support of this project.
