Capital Improvement Program Project Details

Project Title: **Groundwater Well - Evaluation and Rehabilitation**

Project Description: This project consists of video logging of ground water wells and visual inspection of the pumping equipment to identify potential problems with the casing, shafts, and pumping equipment of designated wells. The evaluation will be used to determine the physical condition of the wells including casing breaks, clogged perforations or other issues that would justify rehabilitation, redevelopment or replacement. Initial funds will cover evaluation and possible rehabilitation of Wells 7, 15, 26, 35, 37.

Project Title: **Meter Replacement - Advanced Metering Infrastructure Pilot**

Project Description: This project will include a citywide assessment, audit and analysis of water meter assets. This activity shall include associated appurtenances and backflow devices. This assessment shall include meter GPS location identification, asset type, condition assessment, associated material service types and any other data in support of the project. As a result of this project, any discrepancies between billing data and field asset verification shall be corrected. This assessment is being generated to prepare for the future Advanced Metering Infrastructure (AMI) vendor analysis. A future AMI system will provide the City and residents with accurate real-time water consumption data which is an important part of a comprehensive water conservation program.

Before - AMI

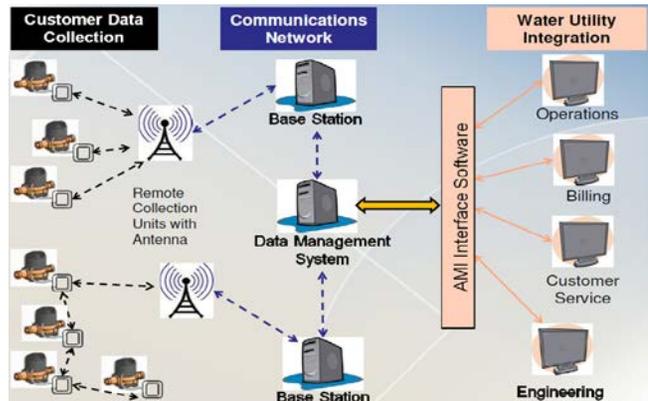

Meter reader obtains values bi-monthly.

Business Services collects and saves the data from meter reader's hand held radios. Billing is based on this data.

After - AMI

Capital Improvement Program Project Details

Project Title: **Palm Lakes Golf Course – Spreading Grounds Feasibility Study**

Project Description: This project consists of the collection and analysis of data to determine the feasibility of providing reclaimed and/or storm water runoff to meet the irrigation needs of the Palm Lakes Golf Course. When the SR-71 Freeway Widening Project takes place, there will be an opportunity to redirect storm water flows and introduce recycled water to the driving range located at the Golf Course. Water spread (recharged) will be credited to the City's Chino Basin Storage Accounts for future pumping rights.

Project Title: **Six Basins - Groundwater Optimization**

Project Description: This project provides for the study and preliminary design for Volatile Organic Compound (VOC) and Nitrate removal in the Six Basins. The study will determine the optimal treatment strategy, treatment technology and implementation timeline. The treatment plant will be designed and operated to maximize groundwater production in Six Basins to meet EPA's proposed lower VOC Maximum Contaminant Levels (MCLs). The project will also explore conjunctive use options in Six Basins, including a new Three Valleys Municipal Water District (TVMWD) connection, additional groundwater production capacity and upgrade of Pedley Surface Water Treatment Plant. Facilities which will support conjunctive use options will be identified and constructed.

Project Title: **Treatment - Chino Basin Groundwater VOC Plant**

Project Description: The project consists of the evaluation of the City's resource: groundwater rights, treatment and production facilities to develop a long term strategy to effectively optimize Chino Basin groundwater production. This project will determine the optimal treatment strategy, treatment technology and implementation timeline. The project will build upon the information and data gathered and the best available technology available. Facilities that will support conjunctive use options will be identified and constructed. Staff will seek outside funding from federal, state and local entities for newly identified facilities.

Project Title: **Water Master Plan (2016)**

Project Description: This Project will provide the City with an evaluation of its existing water system, an evaluation of the future system requirements through 2035: development of water supply strategies to meet the future system needs, and an asset management strategy for production and treatment facilities to meet the appropriate level of service. The project will fully incorporate the City's existing GIS and SCADA systems with its future CMMS to create an interactive tool that will be used to reduce life cycle cost, prioritize maintenance activities and focus capital investments. The City's previous Water Master Plan was completed in 2005 and requires revision to reflect subsequent development and sewer improvements. Hardware and Software will be purchased for the integration of the City's geographic information, hydraulic modeling, meter reading and work order management platforms.

Project Title: **Recycled Water – System Expansion Design**

Project Description: The Recycled Water – System Expansion Design project will include assessment and design portion of the following infrastructure:
 Bonelli Park – Pump stations, pipes, hydrants, valves, and associated appurtenances
 Fairplex – Commitment to cost sharing, real estate for infrastructure and basins
 Cal Poly Pomona – Ridgeway makeup tank, existing meter and associated appurtenances, shared use of Lanterman site for recharge
 City of Pomona – Recycled water infrastructure, abandoned water mains available for casing purposes, installation of recycled water filling station at 2nd St. reservoir site
 Sanitation Districts of Los Angeles County - City of Pomona Water Reclamation Plant (PWRP) infrastructure (pumps, pipes, valves, meters, wet well), expansion of system at PWRP
 Available Right of Way for northern and eastern expansion
